Career Objective

To secure a challenging position in an organization where I can utilize my skills effectively. By contributing my ideas and expertise, I aim to be a valuable part of the team and contribute to the overall growth of the organization.

Skills

HTML5 | CSS3 | JavaScript | Python | Git | GitHub | MySQL | Linux | React.js | Next.js | Tailwind CSS | Jenkins | MS-Excel

Project

My Resume website

I developed my portfolio website using HTML, CSS, and JavaScript. In this website, I designed a very decent navbar that contains three sections. With the help of CSS, I created an animated navbar with hover effects and transitions. The hero section includes text information about me on the left and a developer image on the right. The second section provides information about my qualifications and skills. The last section is 'Contact Me,' where users can connect with me. This is the basic portfolio I developed.
